Statement on Stockholm Convention on Persistent Organic Pollutants (POPs)

The Stockholm Convention on Persistent Organic Pollutants is a global treaty to protect human health and the environment from chemicals that remain intact in the environment for long periods, become widely distributed geographically, accumulate in the fatty tissue of humans and wildlife, and have harmful impacts on human health or on the environment.

The Stockholm Convention on POPs was adopted in May 2001 and entered into force on 17 May 2004 (see http:/www.pops.int)

The following chemicals are listed in the annexes of the Stockholm Convention (Annex A: Elimination, Annex B: Restriction, Annex C: Unintentional production) and the above mentioned EU regulation on Persistent Organic Pollutants (Annex I: Prohibition of production, placing on the market and use, Annex II: Subject to Restriction, Annex III: Subject to release reduction provisions) as listed here:
